

Histology Labels

Labtag.com/histology

Histology Labels

LabTAG® provides labels and ribbons for every step of the histological process, from tissue extraction and preparation to staining and imaging. Our xylene-resistant labels are designed for microscope slides, paraffin wax blocks, plastic containers, slide boxes stored in deep-freeze conditions and resin embedding.

Our chemical-resistant labels withstand direct exposure to and immersion in xylene, toluene, alcohols, formalin, hexane, acetone, dimethyl sulfoxide (DMSO), acetonitrile (ACN), as well as other harsh chemicals and organic solvents.

XyliFIL™

Xylene & Chemical-Resistant Labels for Histology

- Withstands immersion in xylene, up to 5 hours
- Resistant to a wide range of chemicals, solvents, & stains
- Compatible with manual and automated slide processing systems
- Printable using common thermal-transfer printers

*Other sizes and configurations are available on www.Labtag.com

- Ideal for identifying glass microscope slides used in histology, won't absorb histology stains
- Designed to withstand prolonged xylene immersion, more than 24hrs
- Resistant to xylene, ethanol gradient series, oils, organic solvents, xylene alternatives, and various histology stains
- Temperature range on microscope slides from -80°C to +120°C
- Suitable for use with automated slide processors
- Compatible with all common thermal-transfer barcode printers

HistoLAM™

Self-Laminating Thermal-Transfer Labels for Histology

- Secure sample identification throughout the entire multi-slide processing and staining protocol (i.e. Special Stainers)
- Lamination protects printout from harsh chemicals and solvents, even during extended immersion
- Excellent stain repelling properties and thorough distribution of reagents during automated processing
- Convenient and quick integration into existing label printing systems for maximized productivity and efficiency

SKU#	Inches (W x H)	mm (W x H)	Core	Labels/Roll
AFT-1C1-0.5WH	0.8" x 0.9"	20.3 x 22.9	1"	500
AFT-1C3-1WH	0.8" x 0.9"	20.3 x 22.9	3"	1,000

- Adhere to hard-to-stick surfaces, such as paraffin-embedded tissue cassettes
- Withstand a range of temperatures (-55°C/-67°F to 70°C/158°F), suitable for use on recently cooled wax blocks
- Resistant to harsh chemicals and solvents, including xylene, toluene, hexanes, alcohols, acetone, and methyl ethyl ketone (MEK)
- Compatible with all common thermal-transfer barcode printers

Freezer Grade Alcohol-Resistant Labels

For Fixation Containers and Slide Storage Boxes

- Withstand extended storage in temperatures as low as -80°C/-112°F
- Ideal for the identification of containers and slide storage boxes, particularly for immunohistochemistry processed slides and tissue fixation
- Resistant to spraying and swabbing with ethanol solutions and exposure to formalin solutions
- Compatible with all common thermal-transfer barcode printers
