

XyliFIL™

Xylene & Chemical-Resistant Labels for Histology

5hr
Xylene
Immersion

- Withstands immersion in xylene, up to 5 hours
- Resistant to a wide range of chemicals, solvents, & stains
- Compatible with manual and automated slide processing systems
- Printable using common thermal-transfer printers

XyliFIL™ labels are perfect for identifying microscope slides used in histology and pathology labs, as well as material and containers that may be exposed to various chemicals and solvents. They are well-suited for histological staining protocols (routine and special), will resist immersion in xylene for up to 5 hours, as well as exposure to the new generation of safer, non-toxic xylene alternatives and temperature treatments (+70°C). Compatible with manual and automated slide processing systems, these microscope slide labels can be printed with readable text and 1D/2D barcodes using most common thermal-transfer printers.

SKU#	Inches (W x H)	mm (W x H)	Core	Labels Across	Perforation	Labels/Roll
XFLA-117C1-3WH	0.866" x 0.59"	22 x 15	1"	1	Yes	3,000
