

XyliSTUCK™

Xylene & Chemical-Resistant Labels for Histology (24hr+ Immersion)

XyliSTUCK™ labels are specially designed to withstand prolonged xylene immersion, up to and exceeding 24 hours, as well as direct exposure to various solvents and lab conditions associated with standard histology preparations. This includes resistance to xylene and xylene substitutes, ethanol gradient series, histology stains, temperature treatments (+70°C), as well as MEK, oils, and continuous wiping and rubbing with alcohol- and alkyl chloride-based surface sanitizing wipes. These microscope slide labels can be printed with most common thermal-transfer printers, with alphanumeric text, 1D and 2D barcodes, and serialized numbers.

- Withstand prolonged xylene immersion, more than 24hrs
- Resistant to a wide range of chemicals, solvents, & stains
- Compatible with manual and automated slide processing systems
- Printable using common thermal-transfer printers

SKU#	Inches (W x H)	mm (W x H)	Core	Labels Across	Perforation	Labels/Roll
XRM-117C1-3WH	0.866" x 0.59"	22 x 15	1"	1	Yes	3,000
